HAND, FOOT and MOUTH DISEASE

We have a confirmed case of HAND, Foot and Mouth Disease. This is a common Viral disease and occurs from time to time in the community. Symptoms include feeling unwell including fever, vesicles (blisters) in the mouth and on the hands and feet. This infection is NOT related to the Foot and Mouth Disease found in animals.

Children are excluded from school until the vesicles (blisters) have formed crusts that are dry. Contacts and/or siblings do not need to be excluded unless showing any of the signs of the disease.

There is no immunisation for this disease. Treatment varies according to the symptoms present. Since the virus can be spread through saliva and faeces hand washing is recommended.

Please direct any queries to Mrs Bruce on 9092 5800.

Communicable disease guidelines 2014 Edition

Hand, foot and mouth disease (various Enteroviruses, mostly Coxsackievirus)

A common, acute, viral infection. Symptoms include fever, vesicles (blisters) in the mouth and on hands and feet. This infection is not related to the Foot and Mouth Disease found in animals.

Transmission	Airborne or droplet; faecal-oral
Incubation period	3 to 7 days
Infectious period	As long as there is fluid in the vesicles. Faeces remain infectious for several weeks
Exclusion	Exclude until vesicles have formed crusts that are dry
Treatment	Varies according to symptoms
Contacts	Do not exclude
Immunisation	None available

OUR KINDY GARDEN

Taking care of our school is everybody's job and the Kindy kids got their chance last week. Steve the gardener enlisted their help with tending the early childhood gardens. The Kindy kids got a lesson in planting and caring for flowers. They even learnt that you can eat some flowers! Like the pansies we planted. Our garden looked beautiful and we all had so much fun!
